

**ACHORD EYE CLINIC OFFERS A STATE-OF-THE-ART DIGITAL SCANNING TECHNOLOGY THAT ALLOWS US TO VIEW THE INSIDE OF YOUR EYE WITHOUT THE USE OF DILATION DROPS.**

We strongly advise that ALL patients have an optomap® every year with the 200DX, the new scanning digital imaging system.

Retinal problems such as macular degeneration, glaucoma, retinal holes and detachments, melanomas, cancer and diabetic retinopathy can now be seen without dilation for most patients.

**EARLY DETECTION IS CRUCIAL!**

**Advantages of the optomap® Retinal Exam**

1. Retinal image becomes a permanent part of the patient's medical record.
2. A complete thorough view of the entire retina is seen quickly and easily without dilation.
3. No blurred vision and no light sensitivity for the patient because dilation is usually unnecessary.
4. No wasted time for the patient waiting to dilate.

**Without the Optomap or a dilated examination, the doctor cannot fully assess the health of your eye.** There is an additional fee of \$39.00 for the Optomap. This procedure is not covered by insurance. **Dilation may still be required in rare instance.**

\_\_\_\_\_ I elect to have a digital photo of my retina today (\$39.00)

\_\_\_\_\_ I prefer a dilated exam of my retina (no additional fee)
